I think the terms "million" and "billion" are all agreed upon over any country.

$10^6 = 1,000,000 = 1 \text{ million}$

$10^9 = 1,000,000,000 = 1 \text{ billion}$

$10^{12} = 1,000,000,000,000 = 1 \text{ trillion}$
