Goztow wrote on Sun, 25 May 2008 04:24I don't think there's anything more someone could do :-S.

That is exactly how I feel. Unless some wise RG Developer decides to help I see no solution.

CarrierII wrote on Sun, 25 May 2008 05:38Must be an issue with some router between you and RG's master servers.

Is your hosts file clear of silly entries? (REALLY long shot)

I suspect that there is an issue with the RG master servers.

I checked my hostfile and the only extra entry is:

```
70.84.132.90  renchat2.westwood.com
```

Which is what I thought was for getting local ladder stats displayed.

Thanks for replying guys.
