i would just like to take this time to point out that reading these forums not only causes me great sadness. because you're all circle-jerking, too many of you think you're something special with your 'mods' and 'im a 3d modeler' or 'scripts' when in reality the majority of you are total and utter apes.

this doesn't strictly apply to this forum of course. its just i see how rife with morons this place is. who don't have a fucking clue.

i know theres going to be so many of you moaning at me and trying to create insults you think outwits me in some way. but the truth is... you can't handle the truth.

why do i post this? because as i did say the majority of you are completely retarded.

blazer and crimson, yeah they're not as utterly fucking stupid as just about everyone of you.

1 VS 1, blah blah penis wagging jesus fucking christ give it a break. i cannot express enough how fucking retarded this place is.

people like roshambo who thinks he is a prodigy of the computing world. and then theres all you 'modders and mappers' and 'look at my project'

and you're shitty signitures and oh god i can't believe i've been reduced to posting here but you're all such fucking morons. (some of you are okay, jake ball, goztow, blazer etc) but JESUS FUCKING MONKEY BALLS the stupidity is rife.

stupid stupid stupid stupid. i eagerly await the many mouth-breathers replies with poor poor insults or just an outright trashing of the thread.

hey why not post some fucking lolcats cause internet memes are so call. haha all your base.

the end.
