Hi, I used to play back 3 or 4 years ago as max kragen, kikturd, kragenx and a few other aka's...went thru some changes and now I don't have the game anymore but want to get in and play and was wondering if this demo is worth downloading or if I should just wait (prolly a month) to be able to afford the whole game?

I tried a couple different torrent d/l's but apparently the servers don't like pirated copies of the game
