FerhagoWhich one would be better for playing games on my computer?

That depends on who you ask, alot of people are bias, and will say the other one is better. Up to you to decide. To be honest, you need to find similar AMD, and Intel system and play it yourself.

All the review you want to read don't mean jack if, you're not 100% sure you want it. Try it out and see what you like, some say AMD, others say Intel. It's a personal taste on that subject.
