Subject: Re: Can't get my orca skin to work
Posted by Reaver11 on Fri, 06 Jun 2008 08:31:55 GMT

It has nothing to do with the settings.

Renegade actually has three orca skins if I remember it correctly

always.dat
01_orca.dds
v_gdi_orca.dds
these ones are mostly used in flyovers and have transparant windows.

always2.dat (in here is the orca you need)
v_gdi_orca_m (sixe 512x512 dxt1)

Westwood made multiple orca's with a tiny changes. Same for the transport chopper. (if you want
to retexture that it is in always2.dat)

Your skin was 256x256 I rezised it probably it is ugly but I suggest you remake your skin or if you
like it how it is now ->
(and that is your work to make it right)
