Buildings -> Generic Buildings -> Find their presets and change the team. Save when you are done. To get this to work in maps, put the objects.ddb from ~/presets into your ~/Renegade/DATA folder. To play online again, take it out of your DATA folder.

i'm not a noob modder i already changed the owner in le and it still attacks me i want to try to make the mod then add maps (with renex) without editing them... and i aded normal under then extracted to pkg cuz i have many reskins there of buildings and stuff
