I'm going to quote myself to show you your retarded mistake of not being able to read whole posts and just reading the "pretty large text".

Reason i didn't add a comma is because, well, niether quotes had commas, and the reason i used quotes is because the words i wanted to use were already typed here before, so i just duplicated and positioned them in a fasion you should understand, but, like usual, you're still completely retarded and not reading whole posts.
