Hades wrote on Sun, 15 June 2008 10:18Is it at all possible to change the strings for Client side in

normal renegade(not a pkg or mix etc) ,or even any other file so i can change Vec names and character names

You cannot add custom strings or change strings for a server-side mod. However, you can edit the strings file in a mod.

If you want to change only your strings, just edit the strings.tdb file and put it in your data folder.
