Goztow wrote on Sat, 21 June 2008 17:41luv2pb, I hope that this patch will be backwards compatible with the normal Renegade. What I mean is that both people with and without the patch should be able to join a server but only people with the patch get the new fixes. A bit like RR is now, so I do think it is possible .

I disagree. I think the best way for this to work is not allowing the player to connect to XWIS without the patch, and for that we need EA to support us officially.
