So your excuse against global warming is that an American spokesperson house "apparently" uses more energy than it should? Great Argument!

Also, so your ignorance of "not exactly knowing for sure" is also an excuse? Maybe there is a reason why Americans are globally hated so much.....

So there is much shit we can't explain, claiming we can't 100% prove it, therefore it doesn't exist is pretty much the stupidest thing ive heard in a while, congrats! Ok, so DNA doesn't exist? Absolute zero, black matter, atoms, all don't exist because we can't specifically nail down exactly what they are? Smart thinking again!

Anything else you would like to be proven wrong on?
