I am full of support for this mod. I have many toys in my home and many many ARMIES of plastic soldiers! I hope with the community's support, we can be seeing results with this mod!

It should be all easy to mod though right? You can change GDI to green soldiers and Nod to tan colour. Then, you can bring in green M48 tanks (standard tank that comes with plastic soldiers) and replace the Med tank with it. Of course...the possibilities are endless!!

NOTE: Who knows? Maybe I can help by giving you ideas for vehicles and characters?
