1280x1024 for Windows

1024x768 for Games

Widescreen is just gross...

Those resolutions are great if you have a 4:3 monitor. But having a 16:10 display makes 4:3 resolutions look gross, sooo

Yeah I would have to agree, trying playing games at 1024x768 (16:10) just doesn't look right lol.
