The soviet union had like 1 rifle to every 3 soldiers at one point.

It was badly equipped to fight a war, were it not for the Germans screwing up so much and the invasion being delayed by 6 weeks, the soviet union would have lost in a matter of weeks.

And in regards to America and WW2, America did so well cos they acted like pussy's for the first 3 years of the war and ignored the murder occuring in Germany and its territories.
