---

A couple months ago i installed YR and started playing as the Allies. The mission was not the usual first mission. It was a strange mission where i started out with a couple guys and a tanya. I had to destroy a cloning vat to rescue the civilians who were being fed into it. After that, a MCV came in and i built my base. UFOs, yuris, and Gatling Tanks kept coming. There was a massive enemy base with 6 cloning vats, 2 construction yards, a chronosphere, dinosaurs, and many psychic towers and gatling cannons littlered the base. I eventually destroyed the base and won the mission but never figured out where it came from. It wasnt in the main campaign so im pretty confused as of now as to whether it was a bonus mission of some sorts.
