Hey guys, i'm having a problem here.
There is something wrong with this line here:
      const char *preset = Get_Preset_Name(Text[1].c_str());

The error that shows up is :
Quote:Error 1 error C3861: 'Get_Preset_ID': identifier not
found c:\Westwood\RenegadeFDS\Server\gmmain.cpp 2479

What is the problem. I cant seem to figure it out.
Note: I just installed VS C++ 2009 because VS2005 is not working. But VS2009 compiled SSGM
when i first opened it.
