Xpert wrote on Sun, 06 July 2008 22:26 Well that was a good talk with dell. They said the same thing you said Ryu. The DVD portion of the rom is messed up.

They are sending me a new one. In the process, I asked for it to be upgraded. Only 9 bucks more.

Thanks for the help guys.

Really? I was expecting Dell to give you shitty support and then hear your rant on how their support sucks.

Just kidding, but yeah - Probably just got a faulty DVD/CD drive, glad to hear they're sending you a new one.
