A lot of what has been said here is old news. I believe that EA would be better off using Renegade has a stepping stone; improving what it didn't deliver (a good single player and netcode) and expanding what made it great (C&C mode).

I'm sure people will buy the game and play it, but I think C&C Renegade and C&C mode in general (mods like APB, AR, etc.) will outlive this game.
