That's hard to say. An APC can hold more people and has more armor, but then, it costs more money and moves slower. If there were enemy defenses, I'd wait for an APC. But if there isn't any defenses, I'd choose the cheaper and faster Humm-Vee or Buggy. As for which one is better of the 2 (Humm-Vee & Buggy), I'd say it depends on the situation. If you want a fast lightly-armored transport, Buggy all the way. But if you want a more heavily-armored transport (50 more health and armor) for those tough situations, I'd definitely choose Humm-Vee. But since you only have the choice of one of them because they're on different teams, I guess it doesn't really matter unless you stole an enemy transport. Anyway, great topic!
