Hello guys,

I have a problem with logging in by multi player.

I filled in my nick but accidentally the wrong password.

Now I also selected " Always login with this account"

Every time I want to login I got the message wrong password.

I deleted the account by my information but still it appears with my login and wrong password. I also FULLY reinstalled the game 3 times already but it wont work.

Were can I change my login and pass?

Please help
