Subject: Re: Any Vista fix for Generals?
Posted by Starbuzzz on Mon, 21 Jul 2008 19:55:40 GMT

WOW fixed it!

That guy ^ is awesome. So, you have to create a options.ini file and put in in the Generals file that is in My Documents. And paste this in:

Quote:AntiAliasing =
DrawScrollAnchor =
GameSpyIPAddress = 0.0.0.0
Gamma = 50
IPAddress = 0.0.0.0
IdealStaticGameLOD = High
LanguageFilter = false
MoveScrollAnchor =
MusicVolume = 55
Resolution = 800 600
Retaliation = yes
SFX3DVolume = 79
SFXVolume = 71
ScrollFactor = 50
SendDelay = no
StaticGameLOD = Low
UseAlternateMouse = no
UseDoubleClickAttackMove = no
VoiceVolume = 70

lol...nice...
