Renegade Alert is your equivalent to Red Alert, combining both the fun factor of Red Alert and the revolutionary multiplayer of Renegade.

When the .600 beta of Renegade Alert was released, I couldn't stop playing. The sounds heard when first spawning, purchasing an upgrade or vehicle at a PT, and everything else just made me feel so much like I was submerged into Red Alert all over again. Trust me, if you liked Red Alert, you'll LOVE Renegade Alert.
