wrote on Wed, 23 July 2008 00:09bisen11 wrote on Mon, 21 July 2008 17:14Yah, there's a lot of
horrible servers with terrible mods :/ . I suggest fnfall marathon. It's my fav server.
fnfalls has the worst nazi mods ever that have ZERO sense of humor
along with that

LOL i remember this time at jelly server i almost got banned for saying a friend of mine had
aids....story is his name was koolaids...and i said u have aids ur cool or some shit like that and
some admin pms me saying something like (if i remember this right) "DONT SAY THaT SHIT
AGAIN"or something i told him to calm the fuck down and then saying shit ill ban you and all this
bs i was like whats ur deal...he said i had a feind that dead of aids....im like well to bad for u then
fuck.,...lol..

every server has trashy mods

jelly....bunch of 40 year old geeks or 12 year old kids pushing the rules on other giving them the
glory and power (same ass noob stories...only few good ones)

kamuix....bunch of childish dumbass's (expect bluethen and clown and...forgot the last guy)

EKT.....some hackers...some laggers and a few BITCH mods hwo think there hot shit that talk shit
use commands to give them advantage and then ban u when u ask for test

xphaze....my old server...some mods just get pissed when you hs them or start shit with them over
little reasons and then one mod has a bitch fit starting war world 2 in the forums about one mod vs
another mod

tsu....well most of them are dicks and some hackers which told me they hacked..acting like of they
are the best at ren...and life...talking about how they get laid and shit

nite....one power hungry mod but thats about it

duke gaming....hackers beside there hacking owner....even hacked us in com war once....and of
course him and his players where admins and didnt even listen to use but trust thats a whole
other story

and many more....

*and these comments dont mean the whole server just some of the mods in them so dont get but

hurt*

basically you have to have the same personality and same way of thinking to fit in with some servers....just think of it as high school...stick with the people you fit in with the ones who dont act like pricks to you

I agree with Sadutard that joking about aids isn't really appropiate, but if he's your friend the admin has no reason to get pissed off at you.

Play at N00bless, we have one mod who is kind of a jerk, but that is about it. We have a near perfect balance of cool script mods and pure renegade. And there aren't many cheaters since the mods are generally ontop of stuff.

I got force renguarded by 4 people after killing an sbh who walked right infront of me on that server :/ . I mean seriously, plus doesn't Biatch detect pretty much all cheats anyways? Renguard doesn't even do much anymore.
