cnc95fan wrote on Thu, 24 July 2008 12:10 Models and Objects.ddb files are completely different. There is a message for direct connect, "Version mismatch"... You can't see servers with a modified objects.ddb, this is what I hate about cheaters and the b.s they make up about modified objects.ddb files.

Test it. Modify a model in 3dsmax 8 and go online, you wont see a server there.
