Black-Cell used to use some custom keybinds for keycfg.exe that allowed you to say things like "Repair the (most damaged building)!" and "Focus fire on (player you damaged most recently/[unit/vehicle he is])!" and "Enemy beacon detected at the (building you're nearest to)". Since Whitedragon is listed on the TT member list, maybe he could be convinced to integrate those, or if it's done by the server bots, tell server owners how to do it themselves.
