The Nod Artillery has many various obvious advantages over the MRLS, but if you are good with an MRLS, it can be pretty good. It's only downside is that the rockets move too slow.. anyone can dodge them. However, they do track and are able to fire around corners. I'm going to say I prefer the MRLS over the Artillery.

As for the Mammoth tank and the Stealth tank, it really depends on the situation. For just one single Stealth tank, most of the time the Mammoth is better (just as long as you use the tusk missiles to destroy it and not the cannons). However, if you are with more than 1 stealth tank, then you can easily over power a Mammoth tank.
