Hey all,

Just an update on Army of Earth-

<http://www.armyofearth.com/>

I've just released a new version (0.522) including some of the features some of the Renegaders were asking for - manual teaming, private messaging, and a bunch of other stuff.

You're all most welcome to come give it a try. Ask for help ingame and hopefully somebody will train you up. The forums can help too.

Cheers,

LM
