Can someone tell me the BEST software to run a FTP Server Or w/e it is and tell me how to set it up? YES iv used google but you guys explain it better and are very helpful and i thank you guys for helping me

i want to set it up cuase once a friend (cant get a hold of him anymore had a ftp and i had to download some program and then i set it up to how he wanted so then this program i think its from mozzila showed all his files he was hosting

EDIT:PS, sorry for all the post lately i dont come here unless i have to but thank you all that been putting up with me ill try to keep this my last post for a whiles
