to TT:

create something working, nearly bugfree, gameenhancing and do it in a few weeks/months.

Why. People need to trust TT. They should see what you are doing. Just give them a little cookie thats desperately needed. The whole pie can be delivered next year. Show them Renegade ain't dead. Show them you can do it. Each day nothing changes renegade dies more (i'm afraid. I don't have numbers to prove it although.)
