Just a scroll down list for the existing things. Infantry and vehicles are all that's needed. MAYBE air. But c'mon, there's like 3 air units maximum in most mods as it is, and only 2 in normal Renegade. A simple scrolling function would do just fine.

Theres only 2 released mods :V

Think about flying units in AR, harrier, chinook, etc etc, and there will be many in BFD. SCUD

Storm will, upon next \*proper\* release, feature MANY air units.

Only 2? wtf, where'd you get that number?!
