CarrierII wrote on Tue, 12 August 2008 12:06: Indeed. Can all those CW.CC players going "OMG MY CLANWARS WILL FAIL!!!!" please remember there are people who play in public servers (and don't start your normal prejudiced attitude about publics, before I challenge you (just you) to take on a whole team of random public server players, for lols) and those who play in publics are easily the majority, even if we're less vocal, for the most part.

don't make the mistake of assuming billy and nune actually know what they're talking about when they say a particular change will make clanwars 'fail'...
