well actully (with my knowlege of H bombs) is was pretty actret stuff but it was a little outdated; it told you how to steal the Plutonium-239 or uranium-235 but now there actully guards there and the shipping stations. did you know you can buy it for 40 bucks a pound (thats 20% real U-235) thats real cheap for some one to build a bomb but then you have to have perify it and stuff but still.
