Quote:There's plenty of spots whereas if you remove outside PTs, you will pretty much never be able to disable a beacon in time if you encounter any beacon cover whatsoever. The barracks is especially vulnerable with it having only a single entrance, and that's on nearly any map. Any beacon on the rear end of it would be almost a guaranteed destruction. The back corner of the Refineries (near the tunnels) on Field when the base defenses are offline are also vulnerable. MAYBE THEY ARE SUPPOSED TO BE VULNERABLE TO A 1000\$ BEACON THAT IS FIRING A GODDAMN NUCLEAR MISSILE? HAVE YOU THOUGHT ABOUT THAT?

DO I USE CAPSLOCK? QUITE SO, YES!
