nobody from clanwars.cc supports leaving this glitch

except nunega, whos been there like 2 months

This is stupid, why are you letting a community of players that honestly don't know how to play renegade all that well decide this?

EVERYONE at clanwars.cc knows about this glitch, it is used in every clanwar, ALL the time.

EVERYONE there wants it gone, the only reason people here like it is that they play public servers.. and have a huge advantage over the other noobs in public servers because they dont even know all the outside PT spots.

Shouldn't be decided by the public, majority doesn't know what they're talking about
