See, 84 votes dead even....block this shit..

Conclusion: Even with all those "pro fix" reasons, equal amount of people are voting to not fix it as to fix it. Why such shocking results? Because the specific intent of this patch was to change as minimal (if at all) the current gameplay. These border line issues should be voted on, on these forums, in these sections and let other people from other servers sites come here and vote on this and the pointsfix....

But its clear which side will win, the community.
