I cannot see why people have posted it shouldn't be fixed.

They are apparently unaware that when it is fixed a server-owner can add pt's outside of the buildings. Which is in standard maps easy job and server-side!!! (for newmaps use level-re-edit)

So that would give the opportunity for server owners to choose themselves whatever or not they want pt's to the outside of the buildings.

Better than the solution to not fix it where every server will have the pt's to the outside buildings and there is no choice at all. So everyone can use the pt's as how they like them to be and the bug is gone then.
