Obviously it's not a clear majority. Don't fix it for this patch. Worry about the glitches most don't know about but many are still taking advantage of. Get a baseline and build on top of it.

BTW, I voted for don't fix it. I'm suggesting this be brought back and revoted on after this first patch. I'm not trying to force my preference on whether or not the change actually takes affect. I think it should be postponed.

We never said if it was going to be for this patch or for a (possible) future patch...
