Omg omg omg omg omg! WTF?!

I am so confused at what BR just did! I turned off my computer since the last post (overnight) and now it just randomly works.

Also, when i would start it up, I happen to get a 'Brenbot.exe has encountered a problem and needs to close' thing like 3 times.

About the firewalls, all ren related things are unblocked on my firewall. And for ports, I don't know what the ports are it needs except for 4949 and 6667?

Dan thanks for helping me anyways
Very exciting to get the 'new' BR working
And RoShamBo for a new LUA link
