---

I have a few questions.

1. If I make a mod for my server, will other player, who dont have the mod, still be able to join the game?
2. How can I for example use the command !rail and then you character will obtain the railgun, is that modding or is that possible on other ways?
3. When I create a map, can other player also join the game and play my map?

Thanks!
