NEW!

This mod replaces the C-130 with a Submarine! Few problems with it, but until I update it, LIVE WITH IT, or post a way to fix them....

PIC:

Glitches/BUGS:

Sub flies sideways.

Sub doesn't drop off cargo, but has the cargo spawn at the air strip till it passes by, then the cargo moves.

The second the sub "drops" off the cargo, the top hatch flies open and rotates in a propeller like fashion.

Sub is not civ, like C-130 (c-130 has a 0 with a line through it, while sub has a nod symbol).

-Install like all others, in data folder.

=Samous
