Goztow wrote on Mon, 25 August 2008 01:241. Meant to be, even says it during the installer!
4. Is meant to be this way: stealth technology ain't 100 %. It also shows when you're close to an enemy.

1.) Really? I still think that's silly. Since Nod infantry are so much bigger>_>. O well.

4.)I think footsteps and such showing are fine but why just for jumping(not falling and taking dmg) should the actually sbh itself flash? Footsteps or snow kicking up is perfectly fine imo. Also I didn't know when your close up it shows omgthx;p. This isn't that serious just something I thought I'd mention. 2 and 3 are by far the worst of the 4 things I listed.
