LEAVE MY FRIEND ANANT ALONE

OK, guys what anant was talking about are the beta models of Renegade that recreated the vehicles from the original Command & Conquer game (TD).

(lol here's my rule about games you care about: you gotta have accounts in all important communities thats a rule damnit!)

anant is looking for these models. Strangest coincidence is that all day at work today, I was looking forward to the evening so I can post my request for these as well. Past one week I have gone hyper over anything C&C.

TD Harvy

Buggy:

Flame Tank (wow!)

GDI Humvee (TD)

Dunno what these are? Maybe MCT's...

NOW, I remember last year that Canadacdn (I think) I think made a thread where he told eveyrone to share their beta stuff. And I think, I saw some of these there. There are also many other models like the original Nod light tank:

Light tank:

Recon

Meanwhile, time for me to search this forum!
