Ryu wrote on Sat, 06 September 2008 13:08 Dying by a black hole, How much of a fucking awesome death would that be?

Besides, they're smashing particles together at 7000mph, not the speed of light, nothing bad will happen, there is more of a chance another planet colliding with us than this thing making a black hole.

Either one is fine for me, although I have to say colliding with another planet would be fucking legendary. Alien cultures would worship us until the end of time for our badassery.
