Don't say things you don't know anything about. We can not release only the anti cheat part, splitting the anti cheat part from the rest is probably just as much work as getting the rest released as well. And we can't release all of it currently either, because my guess is that you are not happy with a client that is bugged worse than the original renegade client and that crashes before you finished a single game. If I play Renegade now, I don't use the TT client. Why? Because I can't play properly with it at this stage of development.
