Sorry but when i started (6 years ago)i didn't care about how i could connect, only that i could play online (first game online ever)

So i don't know what this XWIS and WOL are.

from the reply's above me i guess XWIS was the first server that let you play online on C&C Renegade and WOL is the new one because XWIS didn't want to do it anymore.

This happend or did something else happen?

Thanks in advance :3
