I have a section for C-130 drop mods, even a new installer for them, just look around the forums for it, it's in the renegade mods section.

Also, "For Mother Russia Comrad!"  
All Hail Russia!

And, EA-DamageEverything, nice box, while the logo needs work... If you made them. Where can I get the green water mod, or is that just the map?

EDIT: Oh yeah, madrackz, I would gladly use the gun (on page 1), even if it is "flat", or if it is only red, lol. Its still awesome.
