Quote:

Commander A9: It couldn't have been the Tacitus, because that was on the Scrin Ship.

At the end of Firestorm, once you win on GDI's side, the Tacitus pieces merge. There were two pieces - I guess one was in the temple and the other was on the ship.

-setstyle

Not possible. The Tacitus was in one piece at the end of TS. It separated in Firestorm's Kodiak crash.
