i have f_ha_ak47_enter.W3D , f_ha_ak47_exit.W3D , f_ha_ak47_fire.W3D , f_ha_ak47_idle.W3D , f_ha_ak47_relod.W3D

it was made for a replacement for the auto rofle with new hand animations i renamed the w3ds with w3dren maybe w3dren messed something up would it be easier to hex edit it or w3dren isn't the problem ?.
