But then again, if you have 1gb or RAM or less you shouldn't even be running Vista on it in the first place, downgrade it to XP and you will get MUCH better performance.
i have 800 mb of ram but idk why says that i have 1 gb installed physical

Because you do have 1gb of RAM, 200mb of it is used for other purposes though (integrated video/turboboost?)
i do have on board vid card
