Goztow wrote on Mon, 22 September 2008 03:59 Sounds like you got a good deal there then .

Well, sort of. There's two main problems with my Intuos 3 tablet: It's 9x12 (drawing area, not actual physical size) so it's gigantic and won't fit in my laptop backpack... Then there's the vultures at my college that stare at it while I walk in to go to class.
